PROFESSIONAL SUMMARY

A results-driven Data Analyst with BSc in Physics from the University of Nottingham and hands-on experience developing ETL pipelines, APIs, dashboards, and statistical models. Certified in CompTIA Data+ and BCS Business Analysis Foundation. Advanced in Python and Excel, with strong SQL and BI capabilities (Power BI, Tableau). Proven ability to automate workflows, improve data accuracy, reduce processing time, and deliver actionable insights that enhance performance and reduce costs. Seeking an entry-level Data Analyst, Junior Data Scientist, or PMO Analyst role within a data-driven organisation.

KEY SKILLS

Programming & Querying:

- **Excel (Advanced):** XLOOKUP, INDEX-MATCH, Power Query, Pivot Tables
- **SQL (Intermediate)**: Joins, Aggregations, Window Functions
- **Python (Advanced):** Pandas, NumPy, Matplotlib, SciPy

Data Engineering & Management:

- ETL pipeline development (Extract, Transform, Load)
- Data cleaning, validation, and deduplication
- API integration and CRUD operations
- Relational databases & SQLite
- Data warehousing concepts
- Version control (Git)

Analytics & Modelling:

- Feature engineering and exploratory data analysis
- Statistical analysis and probability modelling
- KPI design and performance tracking
- Time-series analysis and forecasting
- Regression analysis and clustering

Data Visualisation & BI:

- Stakeholder-ready insight presentations
- Reporting automation
- Power BI dashboards
- Tableau dashboards

Business & Professional Skills:

- Requirements gathering & stakeholder communication
- Process improvement & workflow automation
- Agile mindset & analytical problem-solving
- Technical documentation

Business Analysis Foundation V4.0 | BCS, The Chartered Institute for IT | 22/09/2025

BCS Foundation Certificate in Business Analysis v4.1 | BCS, The Chartered Institute for IT | 31/10/2025

CertMaster Learn (Data + Preparation) | CompTIA | 19/01/2026

CompTIA Data+ | CompTIA | 10/02/2026

EDUCATION, QUALIFICATIONS & TRAINING

Data Analyst Programme | ITonlinelearning Ltd. | 03/2025 - 02/2026

BSc Physics | University of Nottingham | 09/2016 – 07/2019

TECHNICAL DATA ANALYSIS EXPERIENCE

Bank Data Analysis (Excel & Tableau)

- Built translation mapping logic using XLOOKUP, UNIQUE, and SORT to convert Japanese datasets into structured English datasets.
- Developed Tableau dashboards visualising spending trends, account distribution, and year-on-year comparisons.
- Reduced personal monthly expenditure from ¥80,000 to under ¥50,000 through KPI-driven financial monitoring.
- Designed a structured relational dataset by deduplicating records and resolving null values.
- Automated transformation of multi-source financial CSV files using Power Query.

Web-Scraped Game Dataset ETL Pipeline (Python, Panda, SQLite)

- Conducted exploratory data analysis to rank statistical attributes and visualise top-performing entities.
- Built modular ETL pipeline to extract semi-structured HTML data into structured tabular format.
- Structured project using layered architecture (extract / transform / load separation).
- Normalised schema and implemented CSV + SQLite persistence for reproducibility.
- Parsed nested web tables and engineered numeric performance features.

Media Account Performance Modelling (Ongoing)

- Applying probability modelling and statistical techniques to forecast account growth
- Analysing engagement trends to inform data-driven content strategy decisions.
- Collaborating with stakeholders to define measurable business requirements.
- Identifying high-performing content characteristics through feature analysis.

PROFESSIONAL EXPERIENCE

ALT Mentor | Interac | Toyama, Japan | September 2021 – March 2026

- Delivered structured training sessions to 50+ employees, using feedback and satisfaction data to improve service quality.
- Contributed to acquisition of two new Board of Education clients, supporting regional revenue growth.
- Increased the regional average client satisfaction rating from 80% to 81% over.
- Facilitated English Education for clients when required.
- Maintained a perfect personal client satisfaction score of 100% when conducting work as an ALT.

Duty Manager | Claverton Hotel | Battle, UK | July 2014 - September 2021

- Managed daily operations of a 10-bedroom boutique hotel, overseeing staff, guest services, and compliance standards.
- Maintained and updated customer and reservation data within a relational database, ensuring operational reliability.
- Progressed from Kitchen Porter to Duty Manager through consistent performance and leadership.
- Resolved IT and network issues, improving system uptime and reducing business disruption.
- Improved hotel rating from 4.3 to 4.7 stars through service and process enhancements.
